

## WHEEL HUB CLEANING TOOL (STLWH1) Instruction Sheet

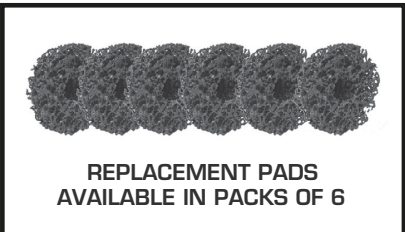

Securely attach the wheel hub cleaning tool to an impact wrench.

Only operate the impact wrench in the **FORWARD** (clockwise) settings so that the pad remains secure during operation.

Operating the tool in **REVERSE** will cause the abrasive pad to detach.

Place the wheel hub cleaning tool over a wheel mounting stud and start the impact wrench to clean away rust and corrosion from the hub. Repeat this process for additional studs requiring cleaning/resurfacing.

**REPLACEMENT PADS  
AVAILABLE IN PACKS OF 6**

Replace worn pad promptly with a genuine Mac Tools cleaning pad, available in a 6-piece set (STLWH1PD).

**WARNING:** Wear safety goggles.

**ADVERTENCIA:** Use gafas protectoras.

**AVERTISSEMENT :** Porter des lunettes de sécurité.
